“Worked All Cambridge District”

Try to work every 10km Ordnance Survey grid square within a 35km radius of Cambridge.

You can complete a square by working "into" it OR by working "from" it, on any band and in any mode. You are welcome to “collect” the squares of everyone present on a net. The use of repeaters and web receivers/transceivers **is** allowed.

There’s no need to log dates and times, just mark each square in some way as it is collected. We will rely on the honesty of any club members claiming a score.
